

Community Builder Overview

Add Social networking to your own website, fast and easy with Joomla! Community Builder, 'CB'. CB, the most popular and comprehensive social networking solution gives you all the tools and usability needed to grow and maintain your website community. Let members search for other members, facilitate member interaction, they will want to keep coming back to your site. Extended member registration functions, profile image uploading, membership content creation, messaging, moderation, reporting and more! Open source, many plugins available and Joomla!™ version independent.

Community Builder Features

- Works natively with all stable flavors of Joomla!™ and Mambo
- Know your members with categorization, lists and reporting features
- Encourage member interaction with member connect features (search, messaging, more!)
- Enable members to create content on your website
- Empower key members to be moderators, 'front-end' moderation available!
- Fully translatable language options (front and back)
- Create your own brand by integrating any CB commercially available template plugin
- Additional add ons available
- Scalable, reliable, robust, secure
- Open source with GPL
- And CB is free!
